PROFESSIONAL SUMMARY

Full Stack Shopify and Shopify Plus Developer with 5+ years of experience building high-converting stores. Specialist in bespoke Liquid coding, pixel-perfect Figma-to-Shopify builds, and complex store migrations that preserve SEO and data integrity. I combine a Computer Science background with an AI-native workflow to deliver high-performance themes and custom app integrations that drive scalable growth. I prioritize engineering rigor, clean and maintainable code.

TECHNICAL SKILLS

- Shopify: Shopify Plus, Liquid, Checkout Extensibility, Shopify Functions, Metafields, Markets.
- Frontend: JavaScript (ES6+), React.js, HTML5, CSS3/Sass, AJAX, JSON, Responsive Design.
- Backend: Node.js, REST/GraphQL APIs, Custom App Integrations.
- Performance: Core Web Vitals, Technical SEO, ADA/WCAG Compliance.
- Tools: Shopify CLI, Git, Figma, Cursor, Claude Code, CI/CD Pipelines.
- Soft Skills: Independent Problem-Solving, Strategic Collaboration, and Technical Documentation

WORK EXPERIENCE

Full Stack Shopify Developer, CodeNdCoffee | Lahore, Pakistan | June 2025 - March 2026

- Architected high-traffic Shopify Plus storefronts using custom Liquid architecture to bypass heavy apps and maintain sub-2s load times.
- Led complex Figma-to-Shopify executions, ensuring pixel-perfect responsiveness and high-conversion UX across all device types.
- Developed custom middleware and Shopify Apps to automate complex business workflows and sync third-party ERP/CRM data systems.
- Implemented AI-native development workflows, leveraging agentic tools to significantly increase code reliability and project delivery speed.

Shopify Developer (Agency, Fiverr & LinkedIn) | Remote / International | Februry 2021 - May 2025

- Delivered bespoke eCommerce solutions for DTC brands in the beauty, wellness, and lifestyle sectors. Engineered custom theme sections and advanced logic for subscription-based wellness and D2C brands.
- Integrated global payment gateways and specialized third-party APIs for international retail ecosystems.
- Managed end-to-end project lifecycles for US and UK-based clients in high-ownership remote environments.
- Troubleshoot complex API integrations and app-related bugs, ensuring 100% stability during high-traffic launch windows.
